1. Per the references, I recommend that Lance Corporal Monson be separated from the United States Marine Corps with a characterization of service of General (under Honorable conditions).

2. Lance Corporal Monson hails from the city of Spring Creek, Nevada. He entered military service through Military Entrance Processing Station Salt Lake City, Utah. [redacted] Since this diagnosis, he has been a burden to the Marine Corps by communicating threats to his chain of command, degrading unit morale, and becoming an opponent of the unit's good order and discipline. The only clinically significant treatment remaining is a change in environment with discharge from the military for his condition.

3. Lance Corporal Monson's condition prevents him from fulfilling the requirements of military service. His condition is unlikely to improve without removal from a military environment. As such, Lance Corporal Monson is recommended for separation from the United States Marine Corps.

4. Lance Corporal Monson's average proficiency/conduct marks: 4.1/4.1. Recommended separation marks: 3.8/3.8. He holds no security clearance. He does not have mobilization potential. He has not deployed and has screened negative for both PTSD and TBI.
